

HOW BIG WAS GEORGE?

Activity #1

Dinosaurs came in many different shapes and sizes. George's species, lambeosaurus lambei, was known to reach up to **15 metres** in length!

- 1 | Use a measuring tape, string, and masking tape to mark out the lengths of various species in the dinosaur size chart below. Don't forget to label your tape lines!
- 2 | Lay down next to the marked out lengths on the floor. How long are you? How do you compare to the size of these dinosaurs?

DINOSAUR SIZE CHART
